

RESTRICTED SUBSTANCES LIST

Below you find a comprehensive listing of substances banned and/or restricted by CommScope in relation to the application(s) for which the ban and/or restriction applies. These requirements are aligned with the IPC 1752A Standard for Materials Declaration Management and the IEC 62474 screening of REACH Candidate List substances. The bans and restrictions apply worldwide unless specifically made inapplicable by CommScope's specification or specific contract terminology.

This document will be regularly reviewed, and the requirements may be updated when relevant.

REACH ANNEX XIV SUBSTANCES OF VERY HIGH CONCERNS (SVHCs)

REACH Article 33 requires all suppliers to inform their customers if the product they supply includes any article which contains any of the substances in the Candidate List in concentrations > 0.1% w/w of the article. An article is any item which has a special shape, surface or design which determines its function to a greater degree than its chemical composition (e.g. a screw, resistor, wire). Please note that this definition of an article may apply to individual components in your product. For further guidance on what is considered an article under the REACH Regulation please refer to the ECHA Guidance documents.

NOTES

1	<p>The European Commission published Directive (EU) 2015/863 on 4 June 2015 adding the 4 phthalates DEHP, BBP, DBP and DIBP to the list of restricted substances in Annex II to Directive 2011/65/EU (RoHS 2). The restrictions will come into force on 22 July 2019 for most electrical and electronic equipment (EEE). We require our suppliers to comply with this restriction before 22 July 2019 and, starting from today, to declare the phthalates information for parts they manufacture or supply.</p>
2	<p>Regulatory thresholds for substances in these applications are based on emission or exposure limits rather than on the concentration in the product. Examples of regulatory limits are: Formaldehyde: in hardwood plyboard with veneer core – 0.05 ppm (measured as gaseous emission from product) per California Code of Regulations; Radioactive substances -a dose rate exceeding 1 μSv h⁻¹ at a distance of 0,1 m. Because emission and exposure levels cannot be derived from actual concentrations, a threshold level of “intentionally added” is indicated for reporting.</p>
3	<p>CommScope requirements for batteries align with the IEC 62474 database of restricted and declarable substances (http://std.iec.ch/iec62474).</p> <p>To comply with the 2006/66/EC EU Battery Directive and the Korean Quality Management and Safety Control of Industrial Products Act, the IEC 62474 database includes a restriction on Cadmium and Cadmium compounds in all types of batteries of 0.001% (10 ppm) by weight of battery.</p> <p>To comply with the Taiwan Restrictions on the Manufacture, Import, and Sale of Dry Cell Batteries, Chinese Standard GB 24427-2009 “Limitation of mercury, cadmium and lead contents for alkaline and non-alkaline zinc manganese dioxide batteries”, Korea “Law on quality management and control of safety of industrial products Battery regulation”, 2006/66/EC EU Battery Directive, New York Environmental Law “27-0719 Battery Management and Disposal”, the IEC 62474 database includes a restriction on Mercury and Mercury compounds in all types of batteries of 0.0001% (1 ppm) by weight of battery.</p> <p>To comply with the 2006/66/EC EU Battery Directive and the Chinese Standard GB 24427-2009 “Limitation of mercury, cadmium and lead contents for alkaline and non-alkaline zinc manganese dioxide batteries”, the IEC 62474 database includes a restriction on Lead and Lead compounds in all types of batteries of 0.004% (40 ppm) by weight of battery.</p>
4	<p>This restriction ONLY applies to EPS loosefill (also called EPS peanuts) packaging materials as a fill agent for the packing and shipping of product, NOT to all EPS packaging materials (such as cores for reels or EPS cushioning that is used to pack product). The restriction also does NOT apply to expanded polystyrene loosefill packaging materials that comply with the following requirements: (1) On and after January 1, 2014, until December 31, 2016, inclusive, it is comprised of at least 80 percent recycled material. (2) On and after January 1, 2017, it is comprised of 100 percent recycled material.</p>
5	<p>In addition to 8 Polycyclic Aromatic Hydrocarbons (PAH) compounds restricted by Annex XVII, all PAH substances are restricted, please refer to CS-EPC-2001-01 'reference substances' for a complete list of PAH substances. All PAH substances are banned from “intentionally added”. For impurities, shall not contain benzo(a)pyrene above 20ppm per homogeneous material; sum of all PAHs shall not exceed 200ppm per homogeneous material.</p>
