

# Small cell strand mount

CommScope's strand mount holds multiple small cell equipment components, delivering fiber and power aerially in the fastest most economical way while keeping the visual space clean.

- Uses existing infrastructure as an unlimited deployment platform
- Is large enough, at 24 in x 12 in x 15 in, to hold multiple small cell radios, two diplexers, and two antennas
- Utilizes face mounting support to provide azimuth adjustment of the antennas

## Benefits

- Allows for network densification without significant changes to the visual space
- Delivers power and fiber aerially—the fastest, most economical delivery method
- More cost-effective to deploy than traditional wood pole mounts
- Can be maintained by wireline certified crews, covering upkeep costs
- Weighs less than nine pounds but holds as much as 61 pounds of equipment, meeting all requirements on strand-mounted small cells
- Allows the use of tie-backs and spreader bars for increased flexibility
- Is packaged completely flat for more efficient shipping and maneuverability
