

Propel™

Fiber and connectivity platform for data centers

Ordering guide

COMMSCOPE®

Go beyond with Propel fiber and connectivity platform

Trying to improve your data center's capacity and response time or stay ahead of the explosive growth in demand? Sometimes it feels like the faster you run, the further behind you fall. If it's any consolation, you're not alone. The pressure to increase bandwidth, ensure greater agility, improve availability and accelerate deployment cuts across every data center environment—enterprise to hyperscale—and everyone up and down the IT chain.

Satisfying today's demands while preparing for tomorrow's changes starts at the bottom with your physical layer infrastructure. When it comes to the fiber cabling and connectivity to support your evolving network, the list of requirements keeps growing. Fast and reliable isn't enough anymore; you need a physical layer infrastructure that can pretty much do it all.

Propel is a modular, ultra-low loss fiber platform that supports your data center's growth through multiple upgrades and migration cycles. It features high-density fiber panels, modules, adapter packs, splice cassettes, and fiber assemblies that deliver more functionality and speed with fewer parts, and an open path to 400 Gb and 800 Gb.

Propel provides a single-source structured cabling and connectivity solution with all the bandwidth, headroom, design flexibility and ease of installation you need to keep pace with your evolving data center demands. Now you can maximize design options and manageability while reducing deployment time, cost and complexity.

That's why CommScope developed Propel, our newest high-speed fiber platform.

Modular, ultra-low loss and optimized for 16-fiber applications, Propel gives evolving data center networks a flexible, open path to 400G/800G and beyond.

Propel ordering process

Step 1: Choose your panel

Step 2: Choose your components

Step 3: Choose your cable assembly

1 High-density panels

Propel high-density panels are designed to adapt and grow as your needs change. Like all Propel components, the panels are completely modular and interchangeable. They support 16-fiber connectivity and up to 144 LC-connected fibers per RU—giving you the flexibility and density to seamlessly advance to 400 Gb, 800 Gb and beyond.

Propel panels incorporate unique design features that make them faster to deploy and easier to manage than older generation panels. For example, panel blades can be removed with one hand for easier maintenance and changes by a single technician. When inserted, the blades lock in place on both sides to provide more secure patching. A re-designed rear cable management system allows more cable to be securely stored and attached.

At the same time, each panel is highly versatile. Component sizes can be scaled or mixed in each panel or blade.

Propel modules, adapter packs, trunk cables, patch cords, array cables and fanout cables

Propel modules and adapter packs

Four sizes of interchangeable Propel fiber modules and adapters provide the breadth of capabilities for virtually any configuration. Modules support ultra-low loss OM4, OM5 wideband and singlemode fiber applications. MPO modules provide plug-and-play fiber connectivity—enabling greater flexibility, faster deployment, and easier moves, adds and changes. With 8-, 12-, 16- and 24-fiber modules and a wide range of MPO, LC and SN adapter/connector options, the Propel portfolio delivers the versatility your network demands with a minimum number of components.

LC and MPO 8-, 12- and 24-fiber components feature internal shutters to provide enhanced dust protection without the need for disposable dust caps. The shutters are carefully designed to prevent contact with connector ferrules and are translucent to allow light from a VFL to show through. Modules and adapter packs of varying sizes can be mixed on each blade for a best-fit panel configuration. All modules are standardized on Method B Enhanced polarity for easier, faster deployment of duplex and parallel applications.

Propel splice cassettes

Propel splice cassettes provide an end to end Propel solution enabling delivered performance when pre-term is not possible. The splice cassettes are modular similar to other components with any size fitting on a Propel panel blade. Configurations are available with your choice of either single fiber pigtailed or ribbon fiber pigtailed.

Propel ULL trunk cables

- Propel trunk cables ship with toolless cable management clips that attached to Propel fiber panels
- Trunk pulling grips can be pulled using up to 100 lbs/45 kg of pulling tension
- Factory-terminated and tested trunk cables provide superior quality and performance for field connections
- Reliable transmit-to-receive connectivity using Method B Enhanced polarity maintenance maximizes administrative convenience
- Easy upgrade path to parallel transmission and associated applications, and increased value of existing infrastructure

Propel ULL patch cords and array cables

- MPO8 and MPO12 are available in 2 mm patch cable and MPO16 3 mm patch cable
- MPO-LC Uniboot array fanouts constructed with 2.0 mm reinforced furcation tubing for outstanding durability and dependability
- Factory-terminated and tested trunk cables provide superior quality and performance for field connections
- Array fanouts are available with multiple breakout lengths to simplify installation

Propel ULL ruggedized fanout cables

- ULL Propel compatible trunks are provisioned with pins to interface with ULL Propel modules (without pins)
- Propel trunk cables ship with toolless cable management clips that attached to Proper fiber panels
- Trunk pulling grips can be pulled using up to 100 lbs/45 kg of pulling tension
- Factory-terminated and tested trunk cables provide superior quality and performance for field connections
- Reliable transmit-to-receive connectivity using Method B Enhanced polarity maintenance maximizes administrative convenience
- Easy upgrade path to parallel transmission and associated applications, and increased value of existing infrastructure

MPO8 to LC front facing breakout module

The MPO8 to LC front facing breakout module allows for easy breakout of QSFP, QSFP-DD and OSFP transceivers to duplex LC interfaces at the front of a Propel fiber panel. The module enables switch port replication with standard MPO8 un-pinned to un-pinned patch cords connecting the transceiver into the MPO interface. Compatible 2-fiber fiber transceivers are connected into the four duplex LC interfaces of the module.

- ULL performance with Method B Enhanced polarity
- Serialized QR code provides easy access to factory optical test results
- Module breaks out (4) 8-fiber transceivers per Propel blade
