

RT-SERIES-BALLAST-FRAMES

Base Product

RT Series High Capacity Ballast Frames

ANDREW now offers a complete line of high-capacity rooftop pipe sector frames designed for increased loading and lower EPA than traditional angle-based rooftop frames. The new RT-Series rooftop mounts are available in both penetrating and non-penetrating frame designs with multiple face size and pipe count options offered as a single part number to simplify ordering.

The RT-Series rooftop mounts all feature heavy duty 2 7/8" OD face pipes and up to 5 2-7/8" (face width dependent). The frame features built-in mechanical adjustments for roof pitch with either single or dual frame versions to maximize load bearing capabilities.

Product Classification

Product Type Non-penetrating roof frame

Material Specifications

Material Type Hot dip galvanized steel
